One of the most exciting young talents to emerge from France, DJ/producer Darius releases new single 'Helios', the title track from his forthcoming similarly titled EP out on Roche Musique this April 20th.

From his remixes of Flight Facilities, Bondax and MØ racking up millions of hits online to performing alongside such electronic heavyweights as Ben Pearce, Cyril Hahn and Superdiscount, 2014 has been a life-changing year for the producer. Already well-known in his native France for his progressive emotive productions due to last year's critically adored EP 'Romance', Darius manages to perfectly marry the up-tempo rhythms of disco and funk with euphoric house rhythms that are simply breath-taking. Arriving just in time for spring, new track 'Helios' is a mellow soul-laden slice of house that cements Darius as one of most exciting new talents to watch out for this year.
